SPRING DINNER TO BE ON BOARD SANTA MARIA

"A NIGHT IN PORTUGAL" IS THEME FOR GALA AFFAIR SET FOR MAY 4

In a delightful change-of-pace gesture, President Cy Young and his directors have chosen as the scene of GOLD KEY's Annual Spring Dinner — a black tie affair — the first class dining room, and lounge and music room, of the Portuguese luxury liner, the Santa Maria.

On the date selected, Saturday, May 4, the Santa Maria will be berthed at Port Everglades.

The Spring Dinner honors the ladies of GOLD KEY. Portuguese wines and a sampling of famed Portuguese dishes will be a part of the gourmet dinner, which will be preceded by a cocktail hour.

The ship's main rooms will be decorated as though for a farewell dinner of the captain's, after a successful World cruise. A six-piece orchestra will play for dining and dancing.

MEET NEW MEMBERS

BRUCE PITCAIRN

Bruce is a tall, intense young man who is in love with Fort Lauderdale, the South Florida area, and the Atlantic Ocean.

He is a first-class yachts man, and as such is Ocean Race Chairman of the Lauderdale Yacht Club and a past Vice Commodore of the Gulfstream Sailing Club.

He lists his occupation as laboratory technician in Nova's Oceanography program. He gets much pleasure in working at the lab.

Education is most important. The ocean is most important. He shows his interest and respect for both by aiding the Nova operation.

Pitcairn is a famous American name. His grandfather founded the Pittsburgh Plate Glass Co. His father built the Pitcairn Mail Wing airplane and the Pitcairn autogyro. Bruce was educated at Temple University, majoring in education and psychology. He was born at Bryn Athyn just beyond Philadelphia.

His wife, Theodora (Teddy) was a high school classmate. They have seven children — four boys and three girls.

Bruce Pitcairn, center, on open-sea float used in Nova's oceanographic research. Left is Larry Vita, head of Surfside Six. Right, Dr. William S. Richardson, professor of physical oceanography and dean of the Graduate Faculty.

WHO'S A FOREIGNER?

Hopi Indian, questioned by draft board, "Do you speak any foreign language?" "Yes," replied the Indian, "English."

— Aikman

WARREN JAMES HENDERSON

Warren Henderson and James R. "Jim" Killian, Jr., Chairman of the Corporation, Massachusetts Institute of Technology, and a member of the famed Nova University Advisory Board, are proud graduates of the same school — M.I.T.

Warren's full-time hobbies, or occupations, are as an Angus Cattle Breeder and member of Livestock Associations, and as a most active secretary of his M.I.T. Class of 1933.

He and Mrs. Henderson, his Leona, spend their winters on Hillsboro Beach, Pompano Beach, and summers at Fort Rock Farm,

Exeter, New Hampshire. He, too, is retired from active business.

He and Nova's Trustee Board Chairman, James Farquhar, are long-time friends and have much in common in their interest in the production of fine Angus cattle.

Henderson is a member of the Union Club, Cleveland; Hundred Clubs of Broward and New Hampshire; the Royal Palm Yacht and Country Club, Boca Raton; and Boca Raton Hotel and Club.

EARL ALVIN ROSS

Earl Ross, retired — more or less — has become most active in Fort Lauderdale's cultural and civic affairs. He holds trusteeships in the Fort Lauderdale Museum of the Arts, and the Heart Association of Broward County. Later this month he will be a co-chairman of the Art for Heart Auction at the Sheraton.

Earl's hobby is sailing. He has owned a number of Lightnings and Snipes. He is a member of the Coral Reef Yacht Club, Miami; the Corinthian Yacht Club, Chicago, serving as its Commodore in 1950. He is also a member of the Fort

Lauderdale Elks.

An ex-golfer and a sometime fisherman, he looks back on an undergraduate athletic career that included

basketball and football. He studied at the University of Wisconsin and took his law degree at De Paul University, Chicago.

Ross has been in Florida nine years. He is active in the investment field. He is typical of that unique class of South Florida men who say they are retired, and who actually are about the busiest people in the entire area!

LEO GOODWIN, SR.

Leo Goodwin is founder-chairman of the Government Employees Insurance Companies, based in Washington, D.C. Begun in 1936 with three employees, and limited

capital, Government Employees Insurance Company has now grown to one of the top organizations of its kind in the country with several thousand employees. The group includes two additional insurance companies and two finance companies operating on a nationwide basis.

Goodwin has had a rugged and venturesome life. Born on a farm in Lowndes, Missouri, south of St. Louis, son of a country doctor who served his patients via horseback and buggy, he moved with his family to

Choctaw country in the Indian Territory in 1903.

He was a young telegraph operator for the Sante Fe at Guthrie (then the capital) where the exciting word was flashed down, October 14, 1907, that Oklahoma had attained statehood. The celebration was big, and it was "wet."

Leo enjoyed hunting quail, ducks, turkeys and some deer. Today he still has a splendid collection of hunting guns. He got into insurance accounting in San Antonio, and in 1936, with backing from Fort Worth, he opened the company, with insurance for government employees, which has since made insurance history.

Leo is concerned with young people, in keeping boys out of delinquency. The Boy Scout Council of the District of Columbia, on which he served for years, presented him a plaque in appreciation.

Goodwin is an expert writer of letters. . . . He has one more principal claim to fame. He is the father of Leo Goodwin, Jr., Trustee of Nova University and Director of GOLD KEY.

GULFSTREAM

The Jimmy Donns, Senior and Junior, Chairman of the Board and President of Gulfstream Park Race Track at Hallandale, were off to a magnificent start on Gulfstream's 1968 season as the March Novacrat went to Press.

Jimmy, Jr., a Nova University Trustee and a GOLD KEY director, is beginning his seventh year as president of the famed thoroughbred race track.

GALLOPING THOROUGHBREDS!

Keep in mind that a date in late April is our Nova University Benefit Day at Gulfstream race track. We get a share of the mutuel handle for the support of the Gulf Stream Chair of Oceanography . . . so your participation is important. Get your tickets in advance from the University Public Relations office — \$4 for clubhouse and \$2 for grandstand. The specific date will be given in the next issue.

NEWSY DOTS

The Brothers Forman have been elevated to high office by the United Federal Savings and Loan Association. Hamilton C. Forman has been made president, and Dr. Charles R. Forman, treasurer.

* * *

Thanks to the suggestion and cooperation of Bob Barber and Stan Emerson, of Univis, GOLD KEY was able to get a gem of a collection of thumbnail interviews with top members of the Nova Advisory group here in February.

* * *

In the group interviewed and put on tape were Dr. Dayton R. Carritt, M.I.T., who will head the GOLD KEY Chair of Chemical Oceanography; and

* * *

Dr. Paul F. Brandwein, Harcourt, Brace and World, San Francisco; Dr. Barton R. Clarke, Yale University; Nobel Laureates Jensen of Heidelberg and Segre, California; Dr. William Shanner, American Institute Research, Palo Alto, Calif.; and Dr. Athelstan Spilhaus, Franklin Institute, Philadelphia; and Dr. Wendell Mordy, University of Nevada.

* * *

Professor: "Name two pronouns."

Student: "Who, me?"

"Dust I am and to dust I shall return. Meanwhile, I aim to kick up as much of it as I can."

— Barnard

SPRING DINNER (Cont'd.)

French, Portuguese, Italian and English foods are served on the Santa Maria.

Pastries and desserts, not customarily seen in the United States (samples: A castle with lighted candles inside, horses, and a windmill that turns, all far too pretty to eat!) will complete the GOLD KEY dinner.

The Santa Maria has 39 cooks, four pastry cooks, three chefs, 19 stewardesses, 140 stewards. Because of the importance of the GOLD KEY membership, and the uniqueness of the affair planned, the ship's officers and the entire first-class personnel will be dressed in gala uniforms.

The program planned, President Young said, will be largely fun, with informal and audience participation entertainment. A pre-view showing of a 27-minute film of three-minute interviews with members of the celebrated Nova University Advisory Board, including its two Nobel Laureates, will be seen for the first time.

Messrs. Robert O. Barber and Stanley A. Emerson made this film possible through their cooperation, and through the use of their Univis facilities and equipment. It is a gem. William Calkins, of the Nova Staff, handled the interviews.

Arrangements have been made for dancing in the Lounge, which is one deck above the first-class dining room.

The Santa Maria celebrated in 1966 the tenth anniversary of its use of Port Everglades on its "Sunshine Route to Europe." Built in Belgium in 1953, it displaces a gross tonnage of 21,356 tons, has an overall length of 612 feet, accommodates 1,078 passengers served by 377 crew members.

Formal invitations to "A Night in Portugal" will go out next month.

GREETINGS FROM MONTREAL

His honor Jean Drapeau, Mayor of Montréal, sends cordial greetings to all Nova University supporters who were on the recent GOLD KEY Charter Flight to Expo-67.

From Ville de Montréal, Cabinet du Maire, the Mayor expressed his pleasure in the Novacrat report of the trip, and his delight that the sojourn was enjoyed.

He trusts this will not be the last visit to his city, and said that as a token of esteem he was putting GOLD KEY on the mailing list for the monthly "Montreal '68" to bring back memories of the trip.

PRESIDENT'S CORNER

TO THE LADIES!

GOLD KEY will honor its ladies at the formal Spring Dinner on May 4.

The planning and program have been designed with the ladies of GOLD KEY in mind.

We hope to show our appreciation for the backing our ladies have given us all through the year. . . . We want this to be an entertaining, pleasure-filled, relaxed evening.

We look forward to welcoming you!

M. R. "Cy" Young,
President
GOLD KEY of Nova University

HIAASEN HOUSE

Fort Lauderdale's, and GOLD KEY's, Carl A. Hiaasen participated recently in the dedication of Hiaasen House, a new residence for men students at Florida Presbyterian College, St. Petersburg.

Participating in the dedication ceremonies was Miss Maybelle Landmark, sister of Mrs. Hiaasen, in whose honor the building is named. Carl is a member of the Board of Trustees of Florida Presbyterian. Congratulations!

ATOMS OF RIME

by

DR. BRUNO C. SCHMIDT

The higher education goes,
The less there'll be of human woes,
For in the future we shall find
A concert of matter and of mind.
